EMPLOYMENT DETAILS

Tenure Track Assistant Staff Scientist 2024-present
Brookhaven National Laboratory

DESI Level 2 Manager for cross-analysis infrastructure; PI of BNL LDRD and DESI observing program on spectroscopy of weak lensing source galaxies; co-supervising UC Berkeley graduate student.

Chamberlain Fellow 2021-2024
Lawrence Berkeley National Laboratory

Independent research program combining DESI spectroscopy with weak lensing and CMB lensing; co-chair of DESI cross-correlations working group; supervised UC Berkeley undergraduate and graduate students.

Postdoctoral Scholar 2019-2021
University of California, Santa Cruz & University of California, Berkeley

EDUCATION

PhD Physics 2014-2019
Stanford University

Thesis advisor: Risa Wechsler

BA Physics and Mathematics 2009-2013
University of California, Berkeley

FELLOWSHIPS AND AWARDS

- Chamberlain Prize Fellowship (5yr position), Lawrence Berkeley National Laboratory
- Paul Giddings Fellow, Kavli Institute for Particle Astrophysics and Cosmology
- Magna Cum Laude with honors in Physics and Mathematics, University of California, Berkeley

RESEARCH INTERESTS

- Joint analyses of spectroscopic and imaging surveys: DESI combined with weak lensing (DES, Rubin LSST) and CMB lensing
- Next-generation wide-field spectroscopy (DESI Run 2, Spec-S5): science cases, survey design, and spectroscopic calibration of weak lensing samples
- Large scale structure and CMB probes of dark energy, dark matter, neutrino mass, inflation and light relics
- Analytic (effective field theory) and simulation-based models of galaxy clustering, weak lensing, and the CMB
- High performance computing, machine learning, statistical inference

SCIENTIFIC COLLABORATIONS

- Dark Energy Survey: Builder 2014-present
- Rubin Observatory Dark Energy Science Collaboration: Member 2015-present
- Dark Energy Spectroscopic Instrument: Member 2015-present
- CMB S4: Member 2023-2025

LEADERSHIP POSITIONS

- Dark Energy Spectroscopic Instrument: Level 2 Manager – Cross Analysis Infrastructure Working Group 2024-present
- Rubin Observatory LSST Dark Energy Science Collaboration (DESC): DESC–DESI Run 2 Coordination Task Force Convener 2023-present
- Dark Energy Spectroscopic Instrument: Clusters, Cross-Correlations, and Small-scale Clustering Working Group Co-chair 2022-2024
- Dark Energy Survey Small Scales Analysis Team Convener 2017-2022

NEXT-GENERATION SPECTROSCOPY (DESI RUN 2 / SPEC-S5)

- PI, DESI Steel: dedicated DESI observations of weak lensing source galaxies to calibrate Rubin-like samples with wide-field spectroscopy 2026-2027
- PI, BNL LDRD: Mitigating systematics in Rubin LSST weak lensing source samples using wide-field spectroscopy 2027-2029
- Convener, DESC–DESI Run 2 Coordination Task Force: joint science case for DESI Run 2 and Rubin LSST 2023-present
- Contributor to Stage-5 spectroscopy planning (Snowmass 2021): *A spectroscopic road map for cosmic frontier: DESI, DESI-II, Stage-5* and *The MegaMapper* 2022

GRANTS AND COMPUTING ALLOCATIONS

- DOE/Brookhaven National Lab LDRD-B, "Mitigating Systematics in Rubin LSST Weak Lensing Source Galaxy Samples using Wide Field Spectroscopy", $250k/year, awarded (PI, 2027-2029).
- DESI, "DESI Steel", 12 hours DESI observing time ($100k equivalent) (PI, 2026-2027).
- INCITE, "AbacusFrontier: N-body simulations for a new generation of cosmic surveys", 510000 node hours (Co-I, 2026-2027).
- Fugaku, "Correlated Simulations for Joint Analysis of CMB and LSS", (Collaborator, 2023-2026).
- NASA ATP, "Leveraging Weak Gravitational Lensing - Redshift Space Distortions Cross-correlations", (Collaborator, 2022-2024).
- XSEDE, "N-body Simulations for Cosmic Acceleration and Neutrino Science with Wide Field Galaxy Surveys", 320000 node hours (Co-I, 3/22 - 3/23).
- XSEDE, "N-body Simulations for Cosmic Acceleration and Neutrino Science with Wide Field Galaxy Surveys", 43000 node hours (Co-I, 1/21 - 1/22).
- XSEDE, "Cosmological Simulations of Dark Energy and Massive Neutrinos for Wide Field Galaxy Surveys", 4000 node hours (PI, 6/20 - 6/21).

- NERSC, "Cosmological Simulations for Sky Surveys", 44k Node hours (co-I, 1/24 - 1/25).
- NERSC, "Cosmological Simulations for Sky Surveys", 25k Node hours (co-I, 1/23 - 1/24).
- NERSC, "Cosmological Simulations for Sky Surveys", 5M NERSC hours (co-I, 1/22 - 1/23).
- NERSC, "Cosmological Simulations for Sky Surveys", 5M NERSC hours (co-I, 1/21 - 1/22).
- NERSC, "Cosmological Simulations for Sky Surveys", 7M NERSC hours (co-I, 1/20 - 1/21).
- NERSC, "Cosmological Simulations for Sky Surveys", 7M NERSC hours (co-I, 1/19 - 1/20).
- NERSC, "Cosmological Simulations for Sky Surveys", 9M NERSC hours (co-I, 1/18 - 1/19).

SOFTWARE AND SIMULATION PRODUCTS

- **Aemulus** – Suite of N-body simulations and Gaussian-process/neural-network emulators for the matter and biased-tracer power spectra, halo mass function, halo bias, and galaxy clustering, including $w\nu$CDM cosmologies. [repo]
- **ADDGALS** – Algorithm for populating N-body simulations with realistic galaxy photometry, shapes, and SEDs to produce synthetic sky catalogs for wide-field surveys. [repo]
- **Buzzard / Cardinal** – Synthetic sky catalogs built on ADDGALS; widely used for validation of weak lensing, clustering, and 3×2pt analyses in DES, DESI and LSST DESC. Buzzard Simulations Cardinal Simulation
- **Zel'dovich Control Variates (ZCV)** – Variance-suppression technique for cosmological N-body simulations, yielding precision power-spectrum and clustering predictions at a fraction of the simulation cost.
- **HEFT Emulator** – Hybrid Effective Field Theory emulators based off the Aemulus simulations, applied to DES, DESI, BOSS, ACT and Planck. [repo]
- **gholax** – Machine learning accelerated, differentiable inference framework that uses neural network emulators to accelerate slow theory calculations and make them automatically differentiable. [repo]

SELECTED TALKS

30. DESC@KIPAC, KIPAC, Stanford, 12/25 (**Invited**)
29. APS Global Physics Summit 2025 – Latest Results from the Dark Energy Spectroscopic Instrument Special Session, , 3/25 (**Invited**)
28. Bay Area Strings, Information & Cosmology Symposium, , 11/24 (**Invited**)
27. Boston University Physics Seminar, Boston University, 3/24 (**Invited**)
26. Brookhaven National Laboratory Physics Seminar, BNL, 1/24 (**Invited**)
25. Berkeley Astrophysics Roundtable Donor Event, UC Berkeley, 12/23 (**Invited**)
24. SLAC Summer Institute: Artificial Intelligence in Fundamental Physics, SLAC, 8/23 (**Invited**)
23. Future Science with CMB x LSS , YITP, Kyoto, Japan, 4/23 (**Invited**)
22. Cosmology Colloquium, SLAC, 2/23 (**Invited**)
21. Cosmology Seminar, Kavli IPMU, 11/22 (**Invited**)

20. Intriguing Inconsistencies in the Growth of Structure over Cosmic Time, Sesto, Italy, 7/22 (**Invited**)
19. Berkeley Center for Cosmological Physics, Vipolze Conference, Smartno, Slovenia, 7/22
18. DES Y3 Highlight Plenary, DESI Collaboration Meeting, 6/22 (**Invited**)
17. Astro Seminar, NYU, 3/22 (**Invited**)
16. Astronomy Colloquium, University of British Columbia, 10/21 **(Invited)**
15. Astrophysics Colloquium, Stanford University, 6/21 **(Invited)**
14. Dark Energy Survey Year 3 Results Webinar, Virtual, 5/21
13. Institute for Nuclear and Particle Astrophysics Seminar, LBNL, 1/21 **(Invited)**
12. German Center for Cosmological Lensing Seminar, Remote talk, 5/20 **(Invited)**
11. Spectroscopic Surveys: Are We Ready For the Future?, UC Berkeley, 1/20 **(Invited)**
10. AAS Thesis Spotlight, Seattle, 1/19
9. FLASH Seminar, UC Santa Cruz, 9/18 **(Invited)**
8. Astro Seminar, NYU, 9/18 **(Invited)**
7. Berkeley Cosmology Seminar, UC Berkeley, 9/18 **(Invited)**
6. Modeling the Extragalactic Sky, UC Berkeley, 1/18 **(Invited)**
5. Astrophysics Colloquium, Stanford University, 9/17 **(Invited)**
4. Webinar, Laboratório Interinstitucional de e-Astronomia, Brazil, 7/17 **(Invited)**
3. COSMO16, University of Michigan, 8/16
2. KIPAC Tea, Stanford University, 9/16
1. Mock Santiago: Preparing for the Next Generation of Surveys, Universidad Catolica, Santiago, Chile, 4/16 **(Invited)**

STUDENTS/POSTDOCS (CO)SUPERVISED

- Vincent Su, B.S. Stanford ‘17
- Denise Lepore, B.S. CSU Pomona ‘19
- Amara McCune, B.S. Stanford ‘18 (now PhD student in physics at UC Santa Barbara)
- Duncan Wood, B.S. Stanford ‘17
- Judah Luberto, B.S. UC Santa Cruz ‘22
- Nishant Mishra, B.S. UC Berkeley ‘21 (now PhD student in astrophysics at University of Michigan)
- Shi-Fan Chen, Ph.D UC Berkeley ‘22 (now Hubble Fellow at Columbia University)
- Nickolas Kokron, Ph.D Stanford ‘23 (now postdoc at Princeton)
- Enia Xhakaj, Ph.D UC Santa Cruz ‘23
- Rose Hinson, B.S. UC Berkeley ‘24
- Danial Baradaran, B.S. UC Berkeley ‘25

- Jyotsna Ravi, B.S. UC Berkeley '26 (starting PhD at University of Michigan)
- Alexa Bartlett, Ph.D. UC Berkeley '28 (Expected)
- Hugo Camacho, Postdoc, BNL

SERVICE AND OUTREACH

- NSF AAG Panelist (2023)
- Astro Scholar Mentor, Berkeley Astronomy Department, 2020-2021
- LBNL INPA Seminar Committee 2021-2022
- DESI High coordinator 2021-2024
- DESI Education and Public Outreach Committee, 2021-2022
- Organizer for Astronomy on Tap (2016-2020)
- Lead Organizer for "Meetings of Astrophysics Students at Stanford" seminar series (2016-2018)
- Lead Organizer for Stanford Physics Computing Bootcamp (2016-2018)
- Referee: Astrophysical Journal, Monthly Notices of the Royal Astronomical Society, Journal of Cosmology and Astroparticle Physics, Astronomy & Astrophysics, Physical Review D

TEACHING

- Spring 2015: **PHYS25 Modern Physics**
  T.A.
- Winter 2017: **PHYS16 The Origin and Development of the Cosmos**
  T.A.
- Winter 2018: **PHYS16 The Origin and Development of the Cosmos**
  T.A.
